Hi Dietrick,

Could you please provide me with an update on the status of comments?

Thank you,

Chris

Chris,

I just wanted to let you know that we have completed our comments on OU3 and forwarded them to Ginny Hatch, the Environmental Director at YPT. We proposed to send them out as an email from our office, a less formal and faster process with the intent to provide the more formal comments on a later, more complete, draft.

We hope to send those to you later today or Monday. Should we also send those to BP or do we want to discuss them next week first?

Ditrick

Subject: Anaconda Mine Site - OU3 HH CSM Tech Memo

Greetings everyone,

Attached is the OU3 Human Health Conceptual Site Model Tech Memo 1 provided by ARC. As I mentioned on the call, the assumptions and general format of this Tech Memo will serve a model for not only for the follow on Tech Memos for the OU3 Process Areas, but for other OUs, including OU1 Groundwater, therefore it is very important to review and provide appropriate

comments on this document.

I'd like to schedule a discussion in a few weeks after you have had a chance to review to discuss your comments and concerns, perhaps the week of November 30th. Please let me know your thoughts on this.

Looking forward to working with you.

Regards,

Chris

Christopher Dirscherl, P.E.
